# APX 70

## MULTIPLE APPLICATIONS

APX 70 is a generation of profiles with 5 or 6 chambers, which provide optimal static performances and give unlimited options of creating windows. They contribute timeless elegance and underline the unique taste of owner. APX 70 works perfectly with modern constructions, as well as with buildings undergoing renovation.

Forceful constructions of profiles with 70mm of depth and large chambers for steel enforcement guarantee optimal static performances and allow constructing windows of huge dimensions.

## THE BENEFITS

of choosing APX 70 system

modern  
design

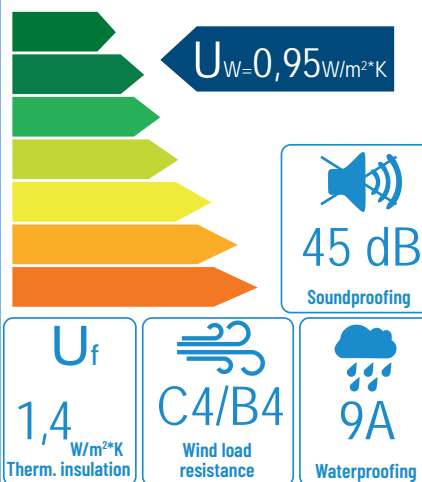

excellent  
thermal insulation

## FEATURES

- 5 or 6-chamber profile
- installation depth: 70-85mm
- large enforcement chamber providing proper statics
- smooth area for simpler cleaning and conservation
- compactness, subtle rounding and bevels giving profiles a modern a sophisticated design
- thermal permeability up to  $U_f=1,4 \text{ W/m}^2\text{K}$ .

## CHARACTERISTICS

OF KEY PARAMETERS

The values are constant for the reference model and differences in indicators may occur in individual implementations.
